What is a power inverter?

A power inverter is an electronic device that converts direct current (DC) power into alternating current (AC) power. In our website, you can find our wide selections of DC to AC inverters with power ratings from 75W to 5000W.

What is a 12V inverter?

12V Inverter. A 12V inverter is an electrical device that converts 12 volts of DC power into AC power. The input power typically comes from a 12V battery. Modified sine wave power inverter can provide you 110/120V or 220/230V/240V AC power.

What is a 24V 600W inverter?

24V 600w inverter with peak power 1200w, which is a modified sine wave, converts your car battery power to AC power 110/120 Volt or 220/230/240 Volt for options, with a safe charging design to give your device multi-protection. The modified sine wave inverter's output current is less than 0.1A and the max efficiency is 90%.

Which inverter is compatible with a lithium-ion battery?

Compatible with a lithium-ion battery IPower-Plus is a high-frequency pure sine wave inverter that can convert 12/24/48VDC to 220/230V AC and power the AC loads. It is designed according to the international standard with higher quality, reliability, and safety.

What is a Multiplus-II inverter/charger?
