

## ContainerPower Energy Solutions

# 3900W Solar Panel

## Overview

---

What are 390 watt solar panels?

The 390 watt solar panels we offer on our website are a full-fledged alternative to central power plants. They are efficient solar panels that generate more power with better sunlight illumination.

Are JA Solar Panels 390w a good choice?

JA Solar Panels 390w are a popular choice among homeowners in Australia. They are a good choice due to their features like PERC technology and half-cut cells, which boost their efficiency well above 20%.

Can a solar power system be used off-grid?

Not only can it be used off-grid, but when there is no sunlight, it can also receive electricity from the grid to charge the battery to meet all-weather use, which will protect appliance life with no electromagnetic pollution and has 99.9% high efficiency power. You can remotely monitor the running status of the system through APP.

What is a bifacial solar panel?

Bifacial Solar Panel: Solar panels using 12BB solar cells, backsheet using composite materials, transmittance up to 91.5%, conversion rate of 23%. The power generation is 858Wh per day under ideal conditions, compared to traditional solar panels, energy surge up to 33%. Size: 52.6 x 26.4 x 1.4inches □ 1335\*670\*35mm □, weight 20.48 lbs
