

ContainerPower Energy Solutions

6-cell battery cabinet supply

Overview

How much weight can a lithium ion battery storage cabinet hold?

Max. Shelf Load Max. Shelf Load: 75 kg Max. Shelf Load: 75 kg We are a supplier of high-quality Lithium Ion Battery Storage Cabinet, featuring a powder-coated steel chamber with self-closing, oil-damped doors for safe storage and controlled battery charging environments.

What are labtron lithium ion battery storage cabinets?

Labtron Lithium Ion Battery Storage Cabinets are engineered for secure storage and controlled battery charging environments. These cabinets feature self-closing, oil-damped doors and triple hinges for maximum structural endurance. They are constructed with a powder-coated steel body and integrated leak-proof sump for safe containment.

How many battery cells are in a battery rack?

All wire connections are placed on the front side of the rack to allow easy installation and maintenance. Since each battery rack hosts 8 battery modules and each battery module has 52 battery cells, each battery Rack has a total of 416 battery cells connected in series.

What is a battery module made of?

The external casing is made of metal covered by insulating materials. For example, the top cover is made of PP, the bottom base is made of aluminum. The copper bars and screws are connected internally to prevent short circuit to ensure the electrical safety of the battery module. Each battery module has 8 temperature detectors.

What is included in a battery management system?

In addition to battery cells, there are switch-disconnectors, contactors, sensors, sampling lines, battery management systems, as well as control units being integrated into the same battery rack. BESS employs a sophisticated,

multilevel battery management system (BMS) for system monitoring and control. Each battery management system including:.

How many temperature detectors does a battery module have?

Each battery module has 8 temperature detectors. There are 2 racks that fit in a single battery cabinet, 9 slots in each battery rack to accommodate 8 battery modules and total 1 BSPU (Battery Switch & Protective Unit). Racks are connected in parallel and paired with a system BMS to meet the power and energy requirements of the application at hand.
