

## ContainerPower Energy Solutions

# 9 billion wind solar and energy storage project in the Middle East

## Overview

---

Who is building the world's largest solar and battery storage project?

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7. Emirati Renewable energy company Masdar (Abu Dhabi Future Energy Company) and Emirates Water and Electricity Company (EWEC) are developing the trailblazing solar and battery storage project.

What is the largest combined solar and battery energy storage system?

Once it's online, will become the largest combined solar and battery energy storage system (BESS) in the world. Located in Abu Dhabi, the project will feature a 5.2 GW solar PV plant coupled with a 19 gigawatt-hour (GWh) BESS. His Excellency Dr. Sultan Al Jaber, minister of industry and advanced technology and chairman of Masdar, said:

What is Al Shuaibah solar project?

One of the most essential renewable energy projects it helps build is the Al Shuaibah solar project. It comprises the Al Shuaibah PV 1 and Al Shuaibah PV 2, which can produce 600 MW and 2,031 MW, respectively. Combined, they can supply energy to an impressive 450,000 households.

What makes Masdar a successful green energy project?

Indeed, Masdar designed the project to be modular and replicable, recognizing that each country has a different green energy mix. The company's 20 years of experience in renewable energy, combined with strong partnerships in engineering, finance, and government, enable it to quickly deploy complex clean-energy systems.

What is a solar-plus-battery project?

The solar-plus-battery project utilizes lithium-iron-phosphate batteries—a more stable and longer-lasting form of lithium-ion technology that's becoming

the grid's chemistry of choice, as it sacrifices a bit of energy density for greater safety and durability. AI's energy profile differs sharply from that of traditional industries.
