Africa Outdoor Energy Storage Power Supply

Overview

Why is BTM energy Storage important in Africa?

BTM energy storage is becoming increasingly important in the African market as grid instability and falling cell prices pushes consumers towards installing storage. In South Africa, Eskom, the country's main electricity utility, registered 69 days of load shedding in 2024, leading to widespread power shortages.

What is the average size of storage projects in Africa?

The average size of these projects sits a ~0.26GWh, a large increase from the projects currently operational. This largely reflects the direction in which the storage market is moving more generally, with larger cell sizes allowing system sizes to increase. Have you read?
