

ContainerPower Energy Solutions

Argentinian energy storage cabinet new energy manufacturer

Overview

Enter Swedish Rongke Energy Storage's new Argentina factory—a \$200 million bet on lithium-ion and flow battery solutions that's making waves from Buenos Aires to Silicon Valley. Let's unpack why this facility could be the missing puzzle piece in Latin America's clean energy transition [1]. Can battery energy storage modernize the grid in Argentina?

The Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

How many MW of battery energy storage will be deployed in Buenos Aires?

The initiative aims to deploy 500 MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded expectations—reaching a combined 1,347 MW.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

What does the Almagba tender mean for Argentina?

The AlmaGBA tender not only signals growing investor confidence in Argentina's energy transition but also sets the stage for grid resilience and renewable integration. Evaluation of submissions is now underway, with final selections expected to shape the country's storage landscape for years to come.
