Australia battery energy storage

Overview

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial commitment stage, according to the latest Clean Energy Australia Report 2025. Why is battery storage so popular in Australia?

A number of government schemes have also driven down battery costs and subsidies, accelerating the adoption of the technology by Australian energy producers and users. In Australia, battery storage for renewable energy is increasingly used in a variety of designs, purposes, sizes and locations. Batteries are used in –

What is the largest battery energy storage project in Australia?

The battery energy storage system project is currently the largest battery energy storage project in Australia under construction. It is planned at Powell Creek to stabilise and store electricity generated from a six-gigawatt solar farm in the Barkly region.

Where is battery storage used in Australia?

In Australia, battery storage for renewable energy is increasingly used in a variety of designs, purposes, sizes and locations. Batteries are used in – The fringes of the grid (areas of poor connection) or off grid (e.g. in microgrids). How are we supporting battery storage technology?

.

How much is battery storage worth in Australia?

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial commitment stage, according to the latest Clean Energy Australia Report 2025.

Why do we need energy storage systems in Australia?

Clean Energy Council chief policy and impact officer Arron Wood said: “Energy storage systems, such as big batteries, are a critical part of Australia’s future energy mix and act as a reliable back-up system allowing us to store renewable energy for when it is needed most and keep the lights on under all conditions.

Why is battery use growing in Australia?

Battery use in the Australian electricity grid is expected to keep growing due to technological advances and rapid cost declines. A number of government schemes have also driven down battery costs and subsidies, accelerating the adoption of the technology by Australian energy producers and users.
