Overview

This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the integration of renewable energy, aligning with the country's ambitious decarbonisation goals.

This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the integration of renewable energy, aligning with the country's ambitious decarbonisation goals.

Finnish energy giant Wärtsilä has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh deployment that brings the company's total energy storage capacity in the nation to 5.5 GWh. The future of.

Technology group Wärtsilä has been contracted by EnergyAustralia to deliver 350 MW / 1474 MWh of capacity to the Wooreen Energy Storage System (WESS) in Victoria, Australia. This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the.

Latrobe Valley, Victoria - EnergyAustralia has today marked a major milestone with the official turning of the sod for the 350 MW Wooreen Energy Storage System (WESS) in the Latrobe Valley. The utility-scale battery storage facility will add reliability to Victoria's energy supply while supporting.

It is now nearly eight years since the first big battery storage project in Australia - at Hornsdale in South Australia - opened for business. The so-called "Tesla big battery" seemed big at the time, and at 100 megawatts (MW) and 129 MWh it was indeed the biggest in the world, and around 100 times.

Potentia Energy's 93MW Girgarre solar PV power plant in Victoria. Image: Potentia Energy (via LinkedIn). Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery storage.

Australian Securities Exchange-listed Origin Energy is set to inject approximately US\$263.7 million (AU\$400 million) into a cutting-edge battery

storage project at the site of its Mortlake Power Station gas-fired peaking power plant in Victoria. This investment underscores Origin's commitment to.
