

ContainerPower Energy Solutions

BYD Energy Storage Power Company in Suriname

SMART GRID & HOME

Overview

Who makes BYD batteries?

BYD is the world's leading producer of rechargeable batteries: NiMH batteries, Lithium-ion batteries and NCM batteries. BYD owns the complete supply chain layout from mineral battery cells to battery packs. These batteries have a wide variety of uses including consumer electronics, new energy vehicles and energy storage.

What is BYD PV+storage?

BYD has developed PV+Storage, a new business model focused on renewable energy production, storage and applications, designed to change the world by leveraging new energy solutions. BYD is the world's leading producer of rechargeable batteries: NiMH batteries, Lithium-ion batteries and NCM batteries.

What does BYD do?

BYD owns the complete supply chain layout from mineral battery cells to battery packs. These batteries have a wide variety of uses including consumer electronics, new energy vehicles and energy storage. BYD has significantly reduced the cost of solar module production, making the total cost of solar power and coal-fired electricity equivalent.

What is BYD's new business model?

BYD has taken the lead in developing a new business model known as PV+Storage, aimed at eliminating bottlenecks in traditional photovoltaic power generation and meeting diverse market needs.

How has BYD changed the world?

BYD has significantly reduced the cost of solar module production, making the total cost of solar power and coal-fired electricity equivalent. This has accelerated the popularization of solar power and made clean energy

available to the general public.
