Battery Cabinet Telecom Battery

Overview

What is a telecom battery?

Telecom batteries are cells or a blocks connected to form a 48V direct current (DC) energy storage system able to supply electricity to an information and communication technology or telecom site when the main power source is unavailable or insufficient.

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

What is a CIBR battery rack?

Charles Indoor Battery Racks (CIBR) are modular, seismic Zone 4 rated (GR-487 certified) battery rack systems designed to fit the footprint of VRLA batteries from a variety of battery manufacturers or Saft Tel.X Ni-Cd batteries. In addition to several standard configurations, there are also single tray options that can be built on site.

What are the features of a battery terminal bus bar?

Battery Terminal Bus Bars: One supply, and one return are prewired in each cabinet. Locking: Extremely secure, strong and impermeable. Lockable handles and hinges are made from Type 304 steel. Lifting Eyes: Crane ready lifting eyes for convenient way to offload and position your enclosure.
