Overview

Battery Room Signs: Clearly label battery rooms to control access and remind everyone of the safety protocols needed in these high-risk areas. Order online today - fast and easy.

Do you need a clear label for a battery room?

Article 608.7 of the IFC requires clear labels for stationary battery rooms and cabinets. More generally, the OSHA standard 29 CFR 1926.200 differentiates between “danger” signs, which concern immediate hazards, and “caution” signs, which address potentially unsafe situations or practices.

What are battery hazard labels & signs?

Battery Hazard Labels: Keep potential dangers top-of-mind by marking batteries and battery storage areas with these hazard labels. **Battery Hazard Signs:** These signs make it clear where battery-related risks exist, helping to prevent accidents before they happen.

What is a battery warning label?

Battery Labels: These labels are perfect for marking individual batteries, ensuring that everyone handles them with the care they require. **Battery Warning Labels:** Warn of specific hazards like electrical shock or chemical burns with these easy-to-read labels.

How can a battery room contribute to safety?

Appropriate signage in the battery room contributes to safety in the following ways: Signs inform employees to use safe behaviors in a specific scenario, and can even remind staff of the appropriate procedures for any common work task. Graphics can be especially helpful.

Why do you need a battery room sign?

When accidents occur in the battery room, a quick response can make a difference. If employees don't need to look for emergency equipment, response times will be much faster; clearly labeled safety equipment is easier

to find and access. Signs allow staff to instantly identify crucial gear so they can quickly respond to the situation.

Do you need a sign for a battery charging area?

Article 52.3.8 of the National Fire Protection Agency Fire Code (NFPA 1) requires signs for accessways into any area that contains storage batteries, as well as battery cabinets and related chemical, electrical, and fire hazards. The NFPA electrical safety standards, NFPA 70E, also require signs in battery charging areas.
