Belarus puts solar power generator on car for home use

Overview

How do I choose the best solar generators?

To pick the best solar generators, we tested some of these power stations for charging capacity, ease of use, weight, and different use cases. Some picks were reviewed by Popular Mechanics test editor Brad Ford, who provided input for the larger-capacity units.

Can solar power be used as a generator?

Technically, these units are electric power stations—giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power—and thus, act as a generator—unless you have both. They also require more than the panel to fully charge and need to be plugged in before use.

Where can I use a gas generator during a blackout?

You'll find standard outlets in the truck bed ready for use. The idea behind these outlets is that truck owners don't have to cart a gas generator around to power their tools on-site, but it's also a great way to get power during a blackout.

Are Anker 535 electric vehicles a good choice?

If you want a portable power station that does a little of everything, get the Anker 535 Electric vehicles have massive batteries and, of course, no engine if it's a pure electric vehicle. USB power outlets and 12V power outlets are common, but some electric pickup trucks have built-in inverters.

Can a car battery be used as a generator?

Typical car batteries can only be discharged to 50% of their capacity before permanent damage can occur. While using your car as a generator by leaving the engine to idle is safe, it's inefficient compared to a gasoline generator (which is itself not a cost-effective way to produce power long-term).

Can you use a car as a power source?

Beyond charging up your phone or other low-power devices, we don't recommend using a car as a frequent power source; the tips given here are to help you access electricity in a pinch. Newer vehicles have USB power sources built into the vehicle, but even older models will have a 12V power outlet that originally hosted car cigarette lighters.
