

## ContainerPower Energy Solutions

# Belgian Energy Storage Battery Company BESS

## Overview

---

Is ENGIE generating a Bess project in Belgium?

ENGIE is also generating two other BESS projects in Belgium which already have credentials in place, a 100-MW/400-MWh scheme in Kallo and an 80-MW/320-MWh battery in Drogenbos. The firm targets 10 GW of battery capacity globally by 2030. At the end of 2023, it contained 1.3 GW of battery capacity in function and 3.6 GW secured under development.

How many MW of battery energy storage system Engie reaches in Europe?

With this new project, ENGIE reaches 500 MW of BESS capacity in Europe, either installed, under construction or at an advanced stage of development. On 31 October 2024, Belgian grid operator Elia announced the result of the country's 4th CRM auction and the selection of ENGIE's Battery Energy Storage System (BESS) project in Kallo.

Where is the largest battery energy storage system in Europe?

The largest battery energy storage system in mainland Europe has gone live in Belgium, as Sungrow and ENGIE completed the first 400MWh phase of the 200MW/800MWh Vilvoorde project. Project: ENGIE Vilvoorde Battery Energy Storage System Capacity: 200MW / 800MWh (400MWh Phase 1 online)  
Location: Vilvoorde, Belgium.

What is bstor & Energy Solutions Group doing in Belgium?

BSTOR and Energy Solutions Group have started building BESS projects totalling 440MWh of capacity in Belgium, using Tesla Megapacks.

When did Engie start building a battery energy storage system?

On July 5th, ENGIE commenced construction of one of Europe's largest Battery Energy Storage Systems (BESS) at its Vilvoorde site in Belgium. This achievement follows the project's construction permit acquisition in July 2023 and its selection for capacity remuneration in October 2023.

Where is ENGIE constructing a massive battery energy storage system?

Brussels (Brussels Morning) – ENGIE is constructing a massive Battery Energy Storage System (BESS) in Vilvoorde, Belgium, with 200 MW capacity and 800 MWh storage, aiming to support 96,000 households with renewable energy solutions.
