# Belgian solar energy storage project subsidies

## Overview

---

Belgian government programs offer grants, subsidies, and other forms of public funding to support BESS projects. It's crucial to research and apply for relevant programs early in the project development phase.

Belgian government programs offer grants, subsidies, and other forms of public funding to support BESS projects. It's crucial to research and apply for relevant programs early in the project development phase.

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery and Resilience Plan ("RRP ") 2. These two subsidy schemes, now under legislative review.

we offer a subsidy for residential storage. The subsidy was launched in Flanders at the beginning of 2020 and it offers households who install energy storage a subsidy of up to EUR 3,200 as Belgium's largest major energy player in the country. By fully deploying battery energy storage, Eneco is.

In Belgium, Minister Lydia Peeters announced the long-awaited subsidy for home batteries. What is it?

And how could it benefit you?

Allow us to explain: How Much You Could Obtain from the Subsidy?

- √ EUR 250 per kWh capacity of the battery
- √ Maximum EUR 3,200 per system
- √ Maximum 35% of the total cost.

In April, an inauguration was held for the 10MW/20MWh EStor-Lux battery storage project in Bastogne, Belgium, with attendees including the country's federal energy minister Tinne Van der Straeten. The lithium-ion battery energy storage system (BESS) was among the first projects to go online using.

This article serves as a comprehensive guide to securing funding for a 270MWh BESS project in Belgium, covering everything from understanding

Belgian renewable energy policies and incentives to navigating the regulatory landscape and structuring a compelling financing deal. Keywords: BESS financing.

Financial close has been reached for a 25MW / 100MWh battery energy storage system (BESS) project in Belgium which has also been successful in a grid capacity auction alongside gas-fired power plants. Without domestic natural gas production, Belgium imports natural gas via cross-border pipelines.
