Wind farms with a capacity of 3,800 MW and solar power plants with a capacity of 12,500 MW are currently in various stages of development in Bosnia and Herzegovina, according to the indicative plan for the development of production 2026-2035, published by the Independent System Operator in Bosnia.

Over the next three to four years, Bosnia and Herzegovina is set to significantly boost its renewable energy capacity, with plans to install solar power plants totaling 1,500 MW and wind farms adding 700 MW. This projection was shared by Edhem Bičakčić, president of the South-East European Regional.

Interenergo recently launched its largest undertaking to date with a wind farm located on Ivan Sedlo Mountain in the Municipality of Hadžići. "This is a major step toward the country's clean energy future," the company said in a press release. The event brought together external partners.

Podveležje wind farm near the city of Mostar KfW Development Bank continues to support Bosnia and Herzegovina in generating electricity from renewable energy sources. This creates alternatives to coal-fired power generation, which dominates Bosnia and Herzegovina's electricity mix. At the.

The construction of Bosnia and Herzegovina's largest solar power plant has officially commenced. The location for the facility with a peak capacity of 125 MW is in the municipality of Stolac, near the village of Komanje Brdo. The

project has caused discontent among some residents. The investment is.

On May 1, 2025, the World Bank's Board of Executive Directors approved a €79.90 million loan and €2.89 million grant to support Bosnia and Herzegovina's National Energy and Climate Plan. This funding aims to enhance energy security, promote economic transition, and create job opportunities in.
