Botswana coal-to-electricity energy storage products

CONTAINER TYPE ENERGY STORAGE SYSTEM

Energy storage system

FC RoHS CE 

Overview

What is the main source of electricity in Botswana?

Botswana's main source of electricity is derived from thermal energy, mainly through burning coal, and also through some diesel generators.

What is the energy situation like in Botswana?

Botswana's energy sector is a growing industry with significant potential. Almost all of Botswana's electricity is generated from coal. There are no identified petroleum reserves, and all petroleum products are imported and refined, primarily from South Africa. Botswana also has an extensive supply of woody biomass, ranging from 3 to 10 tons per hectare.

Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.

How much solar energy does Botswana use?

Botswana has tremendous potential for solar energy utilization, with an annual Direct Normal Irradiation equivalent of 3,000 kWh/m²/a in most parts of the country, with an average insolation on a horizontal surface of 21 MJ/ m².

How is Botswana strengthening its exporting capacity?

To strengthen Botswana's exporting capacity, the GoB is investing in national and regional grid infrastructure, as well as refurbishment of general transmission infrastructure. Botswana Power Corporation (BPC)'s rural electrification program is still ongoing, and this covers new connections and expansion in some villages.
