Brazil solar power generation and energy storage prices

Overview

Will a fee be applied for solar energy in Brazil?

However, Brazil's electricity regulator, Agência Nacional de Energia Elétrica (ANEEL), proposed to apply a fee for solar systems with up to 5 MW of power generation capacity. Further, installing other renewable energy sources such as wind, hydro, and others is expected to hinder the market's growth during the forecast period.

What is solar energy in Brazil?

Solar energy is heat and radiant light from the Sun that can be harnessed with technologies such as solar power (which is used to generate electricity) and solar thermal energy (which is used for applications such as water heating). The Brazil solar energy market is segmented by technology and geography.

How big is solar generating capacity in Brazil?

Compared with distributed solar, utility-scale solar generating capacity at the end of June was only 17.9 GW, according to the Brazilian Electricity Regulatory Agency (ANEEL). As of June 30, 2025, total solar electric generating capacity in Brazil was 23% of the total electric generating capacity.

How many solar power systems are there in Brazil?

As of June 30, 2025, total solar electric generating capacity in Brazil was 23% of the total electric generating capacity. Home and building owners installed more than 3.7 million renewable distributed generation systems in Brazil as of June 30, 2025.

How has distributed solar generation capacity changed in Brazil?

Distributed solar generation capacity grew from less than 1 gigawatt (GW) in 2018 to 40 GW in 2025 through June, accounting for 43% of all electricity capacity additions over that period. In 2012, Brazil implemented net metering policies, which have recently contributed to large increases in distributed solar

generation capacity.

What is the competitive landscape in the Brazil solar power market?

The competitive landscape in the Brazil solar power market is dynamic, with various strategies and innovations shaping the market, ensuring a robust and sustainable energy future for Brazil.
