Bulgarian solar panel prices

Overview

Over the past three years, solar PV panel prices in Bulgaria have dropped by 22%, according to data from the Bulgarian Photovoltaic Association. This price shift mirrors global trends but comes with unique local twists - from government incentives to seasonal demand spikes.

In Bulgaria, the government's elevated fees for photovoltaic (PV) panels and energy storage batteries are hindering the potential for lower electricity prices. The Association for Production, Storage, and Trading of Electricity (APSTE) has raised concerns that these excessive costs not only impact.

The Association for Production, Storage and Trading of Electricity (APSTE) warned that the government's disproportionately high fees for photovoltaic panels and energy storage batteries are preventing the possibility of having permanently low electricity prices in Bulgaria. They also threaten the.

Photovoltaic panels for electricity generation with 25-year warranty. We offer a wide variety of solar panels for roof or ground mounting that have high operational reliability. Photovoltaic panels are one of the main parts of any solar system and their role is to convert sunlight into electrical. How many solar projects are there in Bulgaria?

Currently, Bulgaria operates over 800 megawatts of wind projects Bulgaria has an annual average of 2,100 hours of solar irradiation. As of 2023 over 1,700 megawatts project are operational in Bulgaria and it is growing substantially. Geothermal energy is gaining attention, with legislative proposals to harness Bulgaria's geothermal potential.

What is the reference price for solar energy producers?

The determined reference price for solar producers for the new regulatory period is a concern to investors since for the first half of 2024 the realised price from solar energy producers has been between BGN 105/MWh and BGN 110/MWh.

What is the estimated market price for solar energy producers?

The EWRC has determined the estimated market price (i.e. reference price) for producers of electricity from solar energy to be BGN 141.49//MWh. Based on the reference price, this Decision enables the EWRC to determine the premiums that producers receive from the Electricity System Security Fund (ESSF) as a top-up up to the respective FiT.
