

ContainerPower Energy Solutions

Buy a solar-powered all-in-one outdoor unit

Overview

What is a plug-and-play solar system?

A plug-and-play solar system is an all-in-one kit that can be connected to solar panels, a fuel/backup generator, and/or utility power. These systems are designed to be versatile and expandable, making them suitable for running RVs, off-grid homes/cabins, or as an emergency backup.

What does a solar kit include?

Each solar kit includes all of the cables, connectors, adapters, diagrams, guides, parts and pieces needed to set up a quiet, free, and reliable solar power system. This is backed by our lifetime customer support (phone, email & chat). Experience simplicity, value, and reliability with our complete solar kit packages.

What is the cost of an off-grid solar proposal?

Get a Complimentary Solar Proposal Today! \$150 Value - Free Offer (Limited Time Only!) No Strings Attached. Totally Free. Takes Less than 2 Minutes. Discover the powerful and affordable off-grid power solution you've been searching for with our complete off-grid solar kits.

What are the common uses of a solar power system?

Solar power systems have various common uses, including full-time off-grid living, standalone home backup systems, powering larger shops and outbuildings, and remote or mobile applications like food trucks, construction sites, and small industrial or light commercial needs.
