# Can solar panels be laid flat

## Overview

---

Solar panels shouldn't be laid flat. To maximize their time in the sun, solar panels should ideally face south and tilt between 15 and 40 degrees. Can solar panels be installed flat?

Yes, you can install solar panels flat, but they will experience a degree of energy loss without the slightest inclination towards the sunlight. Although it certainly is advantageous to have a roof that is inclined in the sun's direction, a flat surface will also do.

Should solar panels be installed parallel to a flat roof?

There are advantages and disadvantages to installing solar panels completely parallel to a flat roof vs tilting them up. But the cons outweigh the pros, therefore our best advice for most circumstances is to install solar panels with a tilt of at least 10 degrees from horizontal. Let's find out why.

Should solar panels be laid flat or tilted?

When it comes to self-cleaning, even solar panels tilted at 6 or 7 degrees is better than being laid flat. Depending on your location within New Zealand, a solar power system could generate a striking 10-15% more power if they are tilted to 25 degrees versus being laid flat.

Can you install solar on a flat roof?

While flat roof installations tend to cost more than sloped roof installations, they offer more flexibility in system design: You can install your panels at an optimal angle for peak solar production, making them more efficient. Y You can install solar on a flat roof, but you'll need extra mounting equipment.

Are flat roof solar panels worth it?

You can optimize your panels' angle and direction on a flat roof to ensure they stay in the sun as long as possible, which can lead to high long-term energy savings. A flat roof solar panel installation is entirely feasible and worth it.

You'll just need more racking equipment to ensure your panels face south and are at an optimal angle.

How slanting should a solar roof be?

However, the average slanting roof is angled between thirty to forty-five degrees, which is marvelous for solar panels. Overall, a professional is best positioned to determine how you should mount your solar panels. This is very important, especially if you have a flat roof.
