Is solar power growing in Central Europe?

Solar power generation in Central Europe has grown at more than twice the EU average rate since 2019, according to new figures. German renewable energy developer ib vogt has signed a 70MW solar PV virtual power purchase agreement (vPPA) in Romania.

How big is Europe's solar fleet?

The total EU solar fleet now amounts to 263 GW, up 27% from the 207 GW in 2022. Walburga Hemetsberger, CEO of SolarPower Europe said; "Solar has continued to deliver for Europe in crisis with record-breaking installations. Now as solar hits its own turning point, Europe must deliver for solar.

Who are the major players in European solar development?

Major players in European solar development include Scatec, Lightsource BP, Gresham House, and Aquila Capital. Along with pushing the energy transition forward, these solar developers are dedicated to innovating more opportunities to mitigate global warming and achieve decarbonisation goals.

What is the growth trajectory of the Central & Eastern European solar market?

The Central & Eastern European solar market has sustained its remarkable growth trajectory through 2025. Solar power generation is accelerating at an unprecedented pace, growing faster in CEE than in any other European region.

How big is Europe's demand for solar PV?

Module manufacturing currently stands at around 14.6 GW, 59% higher than 2022. As it stands, less than 2% of Europe's current demand for solar could be met with European-produced solar PV. Questions?
