

ContainerPower Energy Solutions

China s communication base station inverter

Overview

Developed and designed for the requirements of Telecom and Industrial, heavy duty application, which delivers continuous true sine wave output power with high stability. Comprehensive solutions for servers, cloud computing, edge computing, 5G networks and communications infrastructure. Widely applied in communication Power systems, railway power systems, and other power systems to meet the high quality and high reliability requirements, and applicable to all the uninterrupted sine wave AC output systems that are sensitive to power interference and require reliable and clean. In addition, the inverter system offers new opportunities for energy savings by providing backup AC power. DC / AC inverters for telecommunication and communication equipment convert the DC batteries voltage to AC.
