Coal container manufacturers wholesale

Overview

What are coal bin containers?

Coal bin containers are one of our intermodal container products. Coal bins are customized shipping containers with special features for loading and storing coal. Coal is one of the main mining products and it must be stored in a special container.

Why should you choose a coal bin container?

Our Coal Bin Containers have many functions and advantages, so they are suitable for those who have a business in the coal mining sector. The advantages we have to include: This container has 6 (six) doors that can be opened during the loading and unloading process, thus saving you time to unload so that work becomes faster and more effective.

What are the benefits of a coal mining container?

It features a unique drainage system and a door locking mechanism, making it an excellent option for coal mining companies and businesses requiring a consistent coal supply. This container has openings, allowing for efficient unloading of cargo with minimal time spent.

What are the special features of a coal bin?

Special features of the Coal Bin include an open top, special door locking mechanism to keep the coal safe and a drainage system to make sure water flows out of the container. This unit is available in 20 ft & 40ft sizes with doors on all sides. This allows the cargo to be unloaded efficiently.

Where can I buy a shipping container?

Tradecorp supplies high-quality new and used shipping containers for sale throughout the Americas. Our experienced container consultants can walk you through the purchase process to identify the perfect container that best suits your requirement. Please fill-out the contact form and one of our staff will be

in touch.

What is a pallet wide container?

Pallet Wide Containers are slightly wider both internally and externally. There is also a high cube variant that gives extra room for the cargo. This type is suitable if the cargo are stacked on Euro-Pallets. This type of container is the most ideal for shipping or storing cargo that is light and voluminous.
