

## ContainerPower Energy Solutions

# Croatia Hybrid Energy Storage Power Station Project

## Overview

---

The project aims to install up to 60 megawatts of grid-connected battery storage capacity and deploy an advanced virtual power plant platform capable of balancing electricity supply and demand in real time.

The project aims to install up to 60 megawatts of grid-connected battery storage capacity and deploy an advanced virtual power plant platform capable of balancing electricity supply and demand in real time.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and other key partners. The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS).

Croatia's IE-Energy Projekt aims to develop a 60 MW battery energy storage system and virtual power plant in Šibenik. The European Bank for Reconstruction and Development (EBRD) is investing up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a battery.

The European Bank for Reconstruction and Development (EBRD) is set to make a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly formed joint-stock company dedicated to developing a greenfield battery energy storage system (BESS) and a virtual power plant (VPP) in Šibenik.

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations. With solar and wind contributing 18% of national electricity in 2023 (see Table 1), energy storage systems have become the missing.
