Croatia Island Energy Storage Power Station

Overview

The solar power plant on the island of Vis, managed by power utility Hrvatska Elektroprivreda (HEP), was inaugurated in September 2020. The project included a plan for a 1 MW battery storage facility.

The solar power plant on the island of Vis, managed by power utility Hrvatska Elektroprivreda (HEP), was inaugurated in September 2020. The project included a plan for a 1 MW battery storage facility.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

The European Bank for Reconstruction and Development (EBRD) is set to make a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly formed joint-stock company dedicated to developing a greenfield battery energy storage system (BESS) and a virtual power plant (VPP) in Šibenik.

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Željko Tukša, President of the Managing Board of Končar – Power Plant and Electric Traction Engineering (Končar KET). The solar power plant on the island of Vis, managed.

Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and other key partners. The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS).

As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations. With solar and wind contributing 18% of national electricity in 2023 (see Table 1), energy storage systems have become the missing.

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe. The European Commission has approved, under.
