Cuba outdoor solar integrated machine

Overview

Will Cuba get more solar energy by 2030?

By 2030, the country aims to generate more than a third of its electricity from solar parks and other renewable sources. Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power blackouts.

How many solar parks will Cuba have in 2028?

Cuba will have 55 new photovoltaic solar parks in the course of next year, Foreign Minister Bruno Rodríguez said on Thursday. According to the national energy transition strategy, the installation of 92 parks is planned until 2028 to provide more than 2,000 megawatts (MW) of power, the foreign minister noted on X.

Where are the solar panels made in Cuba?

The solar panels used in the project are partly produced by the Cuban Electronic Industry -70 percent of all the solar panels were assembled in Pinar del Río, and 100 percent were installed by the Copextel company ran by the Ministry of Computer Science and Communications (MIC).

How many hours a day can you get electricity in Cuba?

In some provinces, electricity access is limited to a few hours a day. Cuba's eight outdated thermoelectric plants, most of them online since the 1980s and '90s, suffer frequent breakdowns.
