Djibouti New Energy Storage Planning Scheme

Overview

With daily power outages costing businesses 7% of annual revenue, the Djibouti Power Storage Project isn't just an infrastructure plan – it's an economic lifeline. This article explores how cutting-edge battery storage systems could transform the Horn of Africa's energy landscape. Why did Djibouti open up electricity production to independent operators?

For the government, the aim was to open up electricity production to independent operators so as to achieve energy independence as soon as possible. It should be noted that the state-owned company Électricité de Djibouti retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP).

Will Djibouti be the first country to produce 100% green energy?

In its bid to become the first country on the continent to produce 100% green energy by 2035, Djibouti can also draw on other ambitious projects. These include the solar power project in the Grand Bara desert, for which work began in 2020.

Will Djibouti be self-sufficient in energy production in 2035?

In December 2023, the Republic of Djibouti signed up to the African Green Hydrogen Alliance. The country's formidable prospects in terms of renewable energy means that Slim Feriani can look to the future with confidence. "The objective for 2035 is to be self-sufficient in energy production," he says. "We should get there before then."

What is the potential for development in the energy sector in Djibouti?

The potential for development in Djibouti's energy sector remains high. The page below gives an overview of the energy sector in Djibouti.

Does Djibouti have a monopoly on electricity?

It should be noted that the state-owned company Électricité de Djibouti

retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP). “This site has the best wind energy potential in Africa, alongside Tangiers in Morocco,” says François Maze, its CEO.

How will the Ghoubet wind farm impact Djibouti?

In ecological terms, the Ghoubet wind farm will enable Djibouti to reduce its CO2 emissions by around 250,000 tonnes a year. At the same time, it will enable the country to reduce its energy dependence on Ethiopia, from which it currently imports around 50% of its electricity consumption via a high-voltage line.
