Doesn't Bulgaria need base stations for communications

Overview

What is the telecommunications system in Bulgaria?

Telecommunications in Bulgaria include radio, television, fixed and mobile telephones, and the Internet.

Can Bulgarian radio stations be used on a phone?

Bulgarian radio stations can be listened to on iPhone, iPad, iPod Touch, Android, Blackberry, and other app-enabled mobile phones.

What is the energy sector like in Bulgaria?

Bulgaria's energy sector is state-owned and derives most of its output from thermal plants burning fossil fuels, mostly coal and natural gas (52 percent), nuclear plants (41 percent), and hydroelectric facilities (7 percent).

What are the major highway projects in Bulgaria?

Bulgaria has many highway projects under construction, notably portions of the Trans-European motor-way connecting Budapest, Hungary, with Athens, Greece, via Sofia, and with Istanbul, Turkey, via eastern Bulgaria. International investors and the state budget are the main sources for financing road network improvements.

Will Bulgaria build a second bridge?

Bulgaria recognized the need for a second bridge, but mixed signals from Romania have held up the project. However, the reopening of traffic through Yugoslavia following the ousting of Yugoslav leader Slobodan Milosevic in 2000 may rule out bridge construction.
