

ContainerPower Energy Solutions

EU quality energy storage battery models

Overview

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

How much battery storage will Europe have in 2025?

In the most-likely scenario for 2025, 29.7 GWh of battery storage will be installed in Europe, representing a 36% annual growth. By 2029, the report anticipates a sixfold increase to nearly 120 GWh, driving total capacity to 400 GWh (EU-27: 334 GWh).

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Which energy storage battery certifications are available in Europe?

Discover the essential energy storage battery certifications in Europe, including CE, IEC 62619, UN38.3, and EN 50549. Ensure your BESS meets EU safety, performance, and grid compliance standards in 2025.

Is battery storage a political priority in Europe?

We're accelerating battery storage across Europe by making it a political priority: 10X by 2030! In 2024, Europe installed 21.9 GWh of new battery storage capacity: 11th consecutive record breaking year of annual additions Annual growth slows down in 2024 to 15%: inflection point toward next strong

growth phase, led by grid-scale deployment.

Is the battery storage age just beginning in Europe?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her), said: “If Europe has already entered the solar age, the battery storage age is just beginning. With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.
