Egypt Commercial Energy Storage System Investment

Overview

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central.

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central.

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to.

Dubai-based developer Amea Power has agreed to build a 1 GW solar plant with a 600 MWh battery energy storage system (BESS) and an additional 300 MWh BESS. Meanwhile, Norwegian developer Scatec ASA has signed a 25-year power purchase agreement (PPA) for a 1 GW solar array and 100 MW/200 MWh BESS in.

The company has signed Capacity Purchase Agreements to develop the first standalone battery energy storage stations in Egypt. There will be a 500MWh BESS project located in Zafarana and a 1,000MWh BESS project located in Benban. These projects will enhance grid stability and enable greater.

The International Finance Corporation (IFC), a member of the World Bank Group, announced a \$72 million investment in Egypt's first utility-scale battery energy storage system (BESS), marking a significant step in the country's clean energy transition. Developed in partnership with AMEA Power and.

Egypt's government has signed contracts with developer AMEA Power for two large-scale battery energy storage projects, the country's first. Dubai-headquartered AMEA Power announced yesterday (25 February) that it has signed government Capacity Purchase Agreements (CPAs) for the battery

energy.

The BESS will deliver approximately 100,000 MWh and cut nearly 20,000 tons of CO2 emissions annually, contributing to Egypt's goal of reducing power sector emissions by 37%. The International Finance Corporation (IFC) has announced a \$72 million investment to support Egypt's first utility-scale. Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.

Does Scatec have a solar project in Egypt?

In a separate announcement, Norway's Scatec said it had signed a 25-year PPA with Egyptian Electricity Transmission Co. (EETC) for a 1 GW solar and 100 MW/200 MWh battery storage hybrid project in Egypt. "This will be the first hybrid solar and battery project in Egypt," said Scatec CEO Terje Pilskog.

Does AMEA power have a solar project in Egypt?

The latest announcements bring Amea Power's total renewables capacity in Egypt to 2 GW of solar and 900 MWh of BESS. The company claims to have projects in 20 countries, with a pipeline above 6 GW and 1.6 GW currently in operation and under or near construction.

What is Scatec - Egypt's first hybrid solar & battery project?

This project marks a significant milestone as it represents the country's first hybrid solar and battery initiative. With an investment of approximately USD 590 million, Scatec aims to boost Egypt's renewable energy capacity, contributing to the nation's sustainability goals.

Will Egypt build a microgrid?

Earlier this year, state-owned utility Egyptian Electricity Holding Co. held an expressions-of-interest tender for the design, construction and operation of a 8.2 MW solar plant and 2 MW/4MWh battery energy storage system, which would be built at the site of an existing microgrid in western Egypt.

What is AMEA power doing in Egypt?

Amea Power, based in Dubai, is developing two large-scale renewable projects in Egypt after securing two PPAs with Egyptian Electricity Transmission Co. The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area.
