Egypt Energy Storage Power Generation

Overview

Egypt and renewable energy company AMEA Power plan to deploy two stand-alone battery-based energy storage plants to support the integration of renewable energy and improve grid stability in the country. Why is Egypt deploying battery storage?

Egypt's electricity and renewable energy minister, Mahmoud Esmat, said that deploying battery storage was central to the country's strategy to maximise renewable energy potential. The project is meant to meet peak energy demand and stabilise the grid as more solar and wind power is added.

Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.

What is Egypt energy?

Egypt Energy is North Africa's biggest energy event with a legacy of 35 years in the region.

Does AMEA power have a solar project in Egypt?

The latest announcements bring Amea Power's total renewables capacity in Egypt to 2 GW of solar and 900 MWh of BESS. The company claims to have projects in 20 countries, with a pipeline above 6 GW and 1.6 GW currently in operation and under or near construction.

Does Scatec have a solar project in Egypt?

In a separate announcement, Norway's Scatec said it had signed a 25-year PPA with Egyptian Electricity Transmission Co. (EETC) for a 1 GW solar and 100 MW/200 MWh battery storage hybrid project in Egypt. "This will be the first hybrid solar and battery project in Egypt," said Scatec CEO Terje Pilskog.

What is AMEA power doing with Egypt?

The UAE renewable energy company Amea Power has signed an agreement with the state-run Egyptian Electricity Transmission Company to develop two battery storage facilities with a total capacity of up to 1,500 megawatt-hours (MWh).
