Overview

In 2024 we transformed grid-scale energy storage by launching Endurium™, our fourth-generation vanadium flow battery (VFB) specifically optimized for use in large-scale, long-duration, high-throughput energy storage applications up to a GWh and more.

In 2024 we transformed grid-scale energy storage by launching Endurium™, our fourth-generation vanadium flow battery (VFB) specifically optimized for use in large-scale, long-duration, high-throughput energy storage applications up to a GWh and more.

Invinity customers make up the largest deployed fleet of flow batteries in the world; with over 1,500 individual battery modules in the field, our batteries have discharged over 6.5 GWh of energy since 2022. In 2024 we transformed grid-scale energy storage by launching Endurium™, our.

New Product Announcement: Advanced Vanadium Redox Flow Battery
Discover what VRFBs are and how they work. Discover the key benefits, including their long lifespan, scalability and safety features. Explore our range of VRFB solutions, designed to provide flexible options for power and capacity to.

The Global All-Vanadium Redox Flow Batteries Market was valued at USD 168.60 million in 2023 and is projected to reach USD 276.09 million by 2030, growing at a Compound Annual Growth Rate (CAGR) of 7.3% during the forecast period (2023-2030). This growth is driven by accelerating renewable energy.

Our battery stores energy in a liquid electrolyte which utilizes vanadium ions in four different oxidation states. Our flow battery is non-flammable, contains no critical raw materials, is extremely durable and is easily scalable. It is uncomplicated to operate and can be easily integrated into.
