Energy storage cabinets in a large industrial park in Denmark

Overview

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

What is the largest thermal energy storage system in the world?

Image: Hyme Energy. Technology firm Hyme Energy and potential customer Arla Foods are seeking EU funding for a 200MW thermal energy storage system project, which they claim is the largest in the world.

Could Hyme energy be the world's largest industrial thermal storage system?

Hyme Energy claimed it would be the world's largest industrial thermal storage system, and deliver cost-effective CO₂ reductions in the heat production at the Holstebro facility. It would also provide cost savings for Arla.
