Overview

Did Tesla ship a Megapack energy storage system to Australia?

An aerial view of the Tesla Shanghai Megafactory. [Photo/Shanghai Observer] US electric vehicle maker Tesla shipped Megapack energy storage systems from its Megafactory in Shanghai's Lin-gang Special Area to Australia on March 21, according to the company.

What energy storage system does Tesla use?

All of its energy storage units will use Tesla's Megapack electrochemical energy storage system produced at the Shanghai Megafactory. The electricity generated by the photovoltaic system will be directly supplied to the Megafactory, with excess power automatically stored in the Megapack for future use.

How many kilowatts can a Tesla Megapack store?

Tesla's energy storage plant in Shanghai's Lin-gang Special Area commenced operation on Feb 11, as the assembly line started the production of the first Megapack unit. The Megapack, which is an advanced battery system designed for large-scale energy projects, can store more than 3,900 kilowatt-hours of electricity in a single unit.

Where is Tesla's new energy storage megafactory located?

Tesla's new energy storage Megafactory in Lin-gang Special Area – a part of the China (Shanghai) Pilot Free Trade Zone – went into operation on Feb 11, with the factory's first Megapack battery system rolling off the production line.

How many Megapack storage units will Tesla produce a year?

Up to 10,000 Megapack storage units are scheduled to be produced there annually. As Tesla's first energy storage Megafactory outside the United States, and the second of its kind for the EV maker, the Lin-gang plant only

took nine months from groundbreaking, which took place in May 2024, to its official operation.

How much energy can a Megapack store?

Each unit can store over 3.9 MWh of energy—that's enough energy to power an average of 3,600 homes for one hour. Each Megapack unit ships fully assembled and ready to operate, allowing for quick installation timelines and reduced complexity.
