NREL research is investigating flexibility, recyclability, and manufacturing of materials and devices for energy storage, such as lithium-ion batteries as well as renewable energy alternatives. Research on energy storage manufacturing at NREL includes analysis of supply chain security. [Photo by.](#)

NextStar Energy, the battery joint venture between Stellantis and LG Energy Solution, will start series production of battery cells at its factory in Windsor, Ontario, Canada, next month – but not for electric cars initially. If the battery plant in Windsor does indeed officially switch to series.

NextStar Energy, the LG Energy Solution and Stellantis joint venture in Windsor will begin producing lithium iron phosphate ESS batteries alongside existing NCM lines, boosting annual capacity and balancing EV mobility and grid storage demand. NextStar Energy, the equal-share joint venture between.

WINDSOR, ON, Nov. 3, 2025 /CNW/ - NextStar Energy, Canada's first large-scale lithium-ion battery manufacturing facility, is expanding its operations to include the production of energy storage system (ESS) batteries. Starting this month, the Windsor-based plant will begin manufacturing advanced.

Enter the energy storage production industry —the unsung hero keeping our grids stable. As of 2024, China's installed capacity of new energy storage projects has skyrocketed to 44.44 GW, a 40% jump from 2023 [2]. But what's driving this boom, and where's it headed?

Lithium-ion batteries currently.
