Energy storage system price comparison 2 hours

Overview

What is energy storage price?

The price is the expected installed capital cost of an energy storage system. Because the capital cost of these systems will vary depending on the power (kW) and energy (kWh) rating of the system, a range of system prices is provided. 2. Evolving System Prices.

What is the investment cost of an energy storage system?

The investment cost of an energy storage system primarily refers to its initial investment cost. Although energy storage systems differ greatly due to their different principles and forms, it is still possible to distinguish the devices involved in an energy storage system by power components and energy storage media.

What are the different types of energy storage costs?

The cost categories used in the report extend across all energy storage technologies to allow ease of data comparison. Direct costs correspond to equipment capital and installation, while indirect costs include EPC fee and project development, which include permitting, preliminary engineering design, and the owner's engineer and financing costs.

How much does a thermal storage system cost?

The capital cost, excluding EPC management fee and project development costs for a 100 MW, 8-hour tower direct33 thermal storage system after stripping off cost for CSP plant mirrors and towers was estimated at \$295/kWh, of which \$164/kWh (or \$1312/kW) corresponds to power block costs operating on a steam cycle (Lundy, 2020).

How much does gravity based energy storage cost?

Looking at 100 MW systems, at a 2-hour duration, gravity-based energy storage is estimated to be over \$1,100/kWh but drops to approximately

\$200/kWh at 100 hours. Li-ion LFP offers the lowest installed cost (\$/kWh) for battery systems across many of the power capacity and energy duration combinations.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.
