

ContainerPower Energy Solutions

Finland lithium battery pack manufacturer

Overview

Celltech is Finland's leading designer and manufacturer of battery systems and an importer of special batteries. Together with Nordic sister companies, Celltech Group is the largest player in the field in the Nordic countries. Celltech Group is a part of the Swedish technology group, Addtech AB. Does Finland have lithium ion batteries?

Finland is one of the few European countries where the ground contains all the key minerals needed to make lithium-ion batteries: cobalt, nickel, lithium and graphite.

What makes Finland a good battery company?

Finland has expertise throughout the battery value chain, from the mining industry and processing of raw materials to technologies and services related to the manufacture and use of batteries, as well as charging technologies and recycling.

How big is the battery industry in Finland?

The battery industry investment potential in Finland is vast. The companies have plans to make investments worth 6-9 billion euros in the next 5 years. By 2027, the companies plan to have a revenue of 9 billion euros. The number of employees is estimated to be 6 000, and indirectly as much as 20 000.

What are lithium-ion batteries used for?

Lithium-ion batteries are needed, for example, in the electrification of transport, consumer electronics, tools and backup power supplies. Electric batteries also offer solutions for energy storage and enable flexible utilisation of renewable energy. Our experts lead the planning and implementation of projects in the battery industry.
