

ContainerPower Energy Solutions

French energy storage power source factory

Overview

Verkor, a company building a lithium-ion gigafactory in France, and system integrator Nidec ASI will together produce up to 10GWh of battery energy storage systems (BESS) to 2030. How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

How much energy storage capacity does France have in 2022?

France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

Will ABN AMRO be the largest battery energy storage system in France?

Dan Dorner, Chief Commercial Officer Corporate Banking said: "We are happy to have supported this landmark project, which will become the largest battery energy storage system in France upon its completion. This marks ABN AMRO's first BESS transaction in France, and builds upon our broader BESS and renewable energy track record.

What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

Is Verkor building a Gigafactory in France?

Verkor is building a gigafactory in France. Image: Verkor. Verkor, a company building a lithium-ion gigafactory in France, and system integrator Nidec ASI will together produce up to 10GWh of battery energy storage systems (BESS) to 2030.

How will the Cernay Bess contribute to France's energy sovereignty?

“Leveraging an innovative financing structure and deploying storage at scale, the Cernay BESS will contribute significantly to France’s energy sovereignty while enhancing grid stability as renewable energy penetration grows” he added.
