Gambia power generation container

Overview

Where can I find information about energy in Gambia?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Gambia on the IndexMundi Homepage. Find relevant information for Gambia on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

Why did Gambia not import energy?

In countries that export large amounts of energy, falling energy prices can also cause major economic shocks. Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used.

What type of energy is used in Gambia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Gambia: How much of the country's energy comes from nuclear power?

.

How much electricity will Gambia generate in 2025?

The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14MW expected from the OMVG project with Guinea and Senegal, and 50MW from the Souapiti project and the remainder through Independent Power Producers (IPP).

Can wind energy be used for water pumping in the Gambia?

In the mechanical energy application, wind energy has been used for water pumping for many decades in The Gambia. This technology has provided water to populations for decades, especially in the absence of electricity services and thereby providing the much-needed vital essentials of life.

Who owns the power plant in the Gambia?

These facilities are operated by National Water and Electricity Company (NAWEC) and Karadeniz Power ship Koray Bey Company Limited - an Independent Power Producer (IPP). In 2018, the effective electric installed capacity in The Gambia was around 135 MW.
