

ContainerPower Energy Solutions

German energy-saving energy storage equipment manufacturer

Overview

Which energy storage system is most popular in Germany?

Sonnen was top of the pile for residential storage in Germany last year, according to EuPD Research. From pv magazine Germany. Demand for residential energy storage continued to increase in Germany last year, according to analyst EuPD Research, which estimated 65,000 rooftop-PV linked systems were installed.

What types of energy storage systems are available?

From 10 kWh to 30 MWh outputs, connected to low or high voltage, on-grid or off-grid, in combination with solar, wind, hydro or combined heat and power sources – our broad product portfolio of industrial and commercial energy storage systems covers the full range of applications and can be individually adapted to your requirements.

Why should you choose tesvolt energy storage systems?

TESVOLT energy storage systems are the economical choice for the most demanding applications. Made in Germany, in Europe's first ever gigafactory for stationary battery storage systems, in Lutherstadt Wittenberg. Quality, performance, and optimum interplay between the individual components set our storage systems apart from the rest.

What is tesvolt energy storage system?

State-of-the-art prismatic lithium battery cells from Samsung SDI combined with our patented and TÜV-certified Active Battery Optimizer smart cell control system form the core of our storage systems. TESSVOLT energy storage systems are the economical choice for the most demanding applications.

Why should you invest in kritis-capable data servers in Germany?

Data servers in Germany and KRITIS-capable software are designed to effectively protect the new battery storage solution against cyber attacks. In

addition, a world-first thermal runaway propagation prevention system ensures it's a safe investment.
