# German solar module prices

## Overview

---

Like a well-engineered German automobile, solar panel pricing here combines precision engineering with competitive value. As of 2025, entry-level polycrystalline panels start around €45 per unit for basic 50W models, while premium 400W monocrystalline options reach €240+ for.

Like a well-engineered German automobile, solar panel pricing here combines precision engineering with competitive value. As of 2025, entry-level polycrystalline panels start around €45 per unit for basic 50W models, while premium 400W monocrystalline options reach €240+ for.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index.

PV module prices have fallen by around 5% to 8% across all technology classes in recent weeks. says Martin Schachinger, the founder of pvXchange.com. This means that prices are moving strongly back toward the level we saw at the beginning of the year, which can only be described as unhealthy for.

EuPD Research gathers price data for PV modules and PV systems for BSW Solar on a quarterly basis. The data stems from interviews with solar installation companies and an evaluation of offers made to end consumers on online portals. The following data is gathered in the German PV Price Monitoring:.

Like a well-engineered German automobile, solar panel pricing here combines precision engineering with competitive value. As of 2025, entry-level

polycrystalline panels start around €45 per unit for basic 50W models, while premium 400W monocrystalline options reach €240+ for residential.

The Germany Solar Energy Market size in terms of installed base is expected to grow from 100.93 gigawatt in 2025 to 230.71 gigawatt by 2030, at a CAGR of 17.98% during the forecast period (2025-2030). The expansion is reinforced by the country's 80% renewables-by-2030 target and the early-2025.
