Global market share of wind power for communication base stations

Overview

What is the global wind power market report?

This report forecasts revenue growth at global, regional, and country levels and provides an analysis of the latest industry trends in each of the sub-segments from 2018 to 2030. For this study, Grand View Research has segmented the global wind power market report based on the location, application, and region:.

How is the wind power market segmented?

The wind power market is segmented by location and geography. By location, the market is segmented into onshore and offshore wind installations. The report also covers the market size and forecasts for the wind power market across major regions. For each segment, the market sizing and forecasts have been done based on installed capacity (GW).

What is the growth rate of wind power market?

The global wind power market is expected to witness a compound annual growth rate of 4.9% from 2025 to 2030 to reach USD 141.09 billion by 2030. Which segment accounted for the largest wind power market share?

.

Which countries are a potential market for offshore wind power installation?

Brazil, India, Vietnam, and Australia are expected to be the potential markets for offshore wind power installation; however, varying political support in these countries is expected to propel the market growth. Based on application, the utility segment led the market with the largest revenue share of 83.5% in 2024.

Will offshore wind dominate global wind power capacity in 2023?

Onshore wind dominated global wind power capacity in 2023. Due to rigorous

push by governments to install large-scale offshore wind power plants, offshore wind's share is expected to gain market share, however, onshore wind will continue to dominate capacity share in the forecast years.

What is the cumulative installed capacity of the wind power market?

Published: August 20, 2024 Report Code: GDAE1227MAR-ST The cumulative installed capacity of the wind power market was 1,024 gigawatts (GW) in 2023. The wind power market research report provides a clear overview and detailed insight into the market. The report offers historical and forecast data and analysis of wind power capacity and generation.
