

ContainerPower Energy Solutions

Haiti exports energy storage

Applications

Electric motorcycle

Electric Forklift

Electric Boat

Golf Cart

RV

Audio Equipment

Solar Street Light

Household Energy Storage

Energy Storage System

Overview

What are the energy resources in Haiti?

Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels. With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy.

How much energy does Haiti consume?

Haiti consumes approximately 574 million kilowatt-hours of electricity per year. In 2002, the country produced 618 million kilowatt-hours of electricity while consuming this amount. Haiti uses very little energy, with each person using about 250 kilograms of oil equivalent per head, per year. Most of the country's energy comes from burning wood.

Can solar energy be used effectively in Haiti?

Solar energy can be used effectively in Haiti, offering energy self-sufficiency to the most isolated cities in the absence of a power grid. The country's location in the tropics gives it very strong solar energy potential. It is believed that solar energy will play a fundamental role in access to electricity over the next 10 to 15 years.

What challenges does Haiti face in generating and distributing electricity?

Haiti faces significant challenges in generating and distributing electricity reliably. The lack of access to affordable and reliable power significantly hinders investment and business development. The majority of electricity is produced using imported fossil fuels.

Why are electricity rates so high in Haiti?

Electricity rates in Haiti are higher than the average in the region due to EDH's inability to provide reliable, centrally-supplied power. This lack of reliable power continues to drive demand for alternative power solutions, such as new

electrical power systems, generators, inverters, solar panels, and batteries, as well as their maintenance.

What is the solar power plant capacity in Haiti?

The solar power plant in Haiti has a capacity of 1.2 MWp. It is located in the Commune of Jacmel, South-East Department, and is connected to the regional electricity network of Jacmel.
