How is the price of solar panels calculated

Overview

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor. Clicking “Get Your Estimate” submits your data to All Star Pros, which will process your data in accordance with the All Star Pros Privacy Policy. Compare Companies Average Cost Key Factors Cost.

Let’s walk through how we calculate the cost, as well as how to save on solar. The average household needs an 11-kW solar system, which costs anywhere from \$24,000 - \$35,000. The price covers everything from permits to equipment to installation. But that doesn’t mean you have to spend that money.
