# How many panels are needed for solar power generation

## Overview

---

A typical home needs 18-26 solar panels to cover 100% of its electricity usage. While there are many elements you can analyze to determine the ideal size of your future system, these four are most worth your time. Here's a deeper look at each of these elements.

A typical home needs 18-26 solar panels to cover 100% of its electricity usage. While there are many elements you can analyze to determine the ideal size of your future system, these four are most worth your time. Here's a deeper look at each of these elements.

Location Impact is Massive: The same home using 1,000 kWh monthly could need just 16 panels in sunny Arizona but 22 panels in Massachusetts due to solar production ratios varying from 1.0 to 1.8 across different regions. Future-Proofing Saves Money: Adding panels later costs significantly more due.

The right solar company will help you with a comprehensive system, including the right number of panels. A typical home needs 18-26 solar panels to cover 100% of its electricity usage. While there are many elements you can analyze to determine the ideal size of your future system, these four are.
