How much does a 6kw inverter cost

Overview

On average, a 6 kW solar panel system costs \$15,900, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 6kW inverter cost?

For a 6kW system, expect to pay around \$1,500 on your inverter. Choosing a reliable inverter ensures smooth operation and long-term performance, since they typically last for about 5 to 10 years before needing replacement. Installation costs can vary widely based on geography, installation complexity, and permitting.

How much does a 6kW Solar System cost?

We will walk you through the cost, size, and practicality of a 6kW system before you decide to buy. How much does an average 6kW solar system cost?

Based on the average cost of solar in 2025, a 6 kW solar system in the U.S. will cost about \$18,000. With the 30% federal tax credit, the solar system price drops down to about \$12,000.

How much power does a 6kW string inverter generate?

This 6kW string inverter kit requires up to 345 square feet of space and generate 400 to 1,000 kilowatt hours (kWh) of alternating current (AC) power per month. Not bad when you consider that the average American household averages 920kWh per month! Actual power generated will vary based on location, equipment and installation factors.

Is a 6kW Solar System a good investment?

A 6kW solar system should suffice most of your energy needs, but these are expensive, and you must consider multiple aspects before making an investment. But things aren't as complicated as Jackery Solar Generators, and they cost less than solar systems.

How much does a solar inverter cost?

The inverter converts direct current (DC) electricity produced by the panels into usable alternating current (AC) electricity. Prices for string inverters or microinverters vary from \$1,000 to \$3,000. For a 6kW system, expect to pay around \$1,500 on your inverter.

Can a 6 kilowatt solar system save you money?

If you've been considering solar, you're probably curious about costs —and maybe a little envious of neighbors who've already made the switch and are enjoying lower electric bills. A 6 kilowatt (kW) solar panel system can help power your home while reducing monthly utility costs.
