

## ContainerPower Energy Solutions

# How much does the hybrid energy equipment for Mauritius communication base stations cost

## Overview

---

Which power system delivers the most energy for 4G/LTE telecom towers?

However, with the impact of carbon emission on the long term towards the environment, hybrid power system delivers the most energy for 4G/LTE telecom tower. Average annual OPEX savings would be better with hybrid power with the hybrid battery as the main energy storage [10-16].

Can a stand-alone hybrid energy system work in Malaysia?

In the area of the east coast of Malaysia where some of the resorts are in remote islands can be considered as off-grid situation, a stand-alone hybrid energy system using solar, wind, diesel generator looks promising results in the long run.

How much power does a base station use?

Suppose the load power consumption of a base station is 2000 W by using the lithium-ion battery and the corresponding load current is approximately 41.67A (for simplification, here the 2000W power consumption includes the power consumption of the temperature control equipment divided by 48V per battery module).

Which hybrid system has the lowest CAPEX cost?

We can observe that the 4/96 hybrid configuration has the lowest CAPEX cost among other hybrid configurations and also other battery types namely the VRLA 12V and 0/100 12V with replacement cost being considered OPEX. The system with the lithium-ion battery has the highest cost and using VRLA is cheaper.

What is unique about this research based on hybrid energy storage?

The interesting or unique about this research compared to other research-based on hybrid energy storage is to apply hybrid energy storage in the poor grid and bad grid scenarios which are not discussed in another research

before.

Which energy system is best in East Malaysia?

Whereas at East Malaysia, we can see a standalone diesel generator is the best economical but hybrid energy system using renewable energy such as solar PV and energy storage such as batteries can reduce the emissions.
