How much watts of solar power is generated in India

Overview

Solar power generation in India has increased considerably in the last few years. In 2024, the country produced roughly 133.81 terawatt-hours of electricity from solar energy. India aims to achieve a total solar capacity of 280 gigawatts by 2030.

Solar power generation in India has increased considerably in the last few years. In 2024, the country produced roughly 133.81 terawatt-hours of electricity from solar energy. India aims to achieve a total solar capacity of 280 gigawatts by 2030.

Solar power in India is an essential source of renewable energy and electricity generation in India. Since the mid-2010s, India has increased its solar power significantly with the help of various government initiatives and rapid awareness about the importance of renewable energy and sustainability.

Solar power generation in India has increased considerably in the last few years. In 2024, the country produced roughly 133.81 terawatt-hours of electricity from solar energy. India aims to achieve a total solar capacity of 280 gigawatts by 2030. India, blessed with about 300 sunny days yearly.

The country has achieved 100 GW of solar photovoltaic module manufacturing capacity under the government's Approved List of Models and Manufacturers (ALMM). India's domestic solar module production capacity is expected to reach about 216 gigawatt peak (GWp) by the financial year 2028, according to.
