How to make the battery cabinet waterproof

Overview

Can You waterproof a battery?

You can waterproof other shapes of batteries too, the main thing is to take care to keep the contacts clean while you seal all the gaps. you might need to put some tape over the contacts (cut to shape with a knife), then apply the waterproofer, then peel off the tape after it is dry. Waterproof Your Batteries in Seconds!:

How to make a bathroom cabinet waterproof?

Sand the wood, and then apply the water-resistant finish. You can prepare the wood by applying a base-coat of special polish if you wish, but two coats of the water-resistant coating should be enough to ensure that the bathroom cabinet is now waterproof.

Should you keep your batteries dry?

If you do a lot of outdoor work or play in foul weather, you've probably noticed that keeping your batteries dry can be a bit of a hassle - they are metal so they attract condensation. And you've probably also noticed the considerable importance of keeping them dry.

How do I Make my battery impervious?

So - all we need to do to make the battery impervious is to apply our waterproof coating around the dimple area, covering the area where the positive and negative are near each other.

Can a wet battery rust?

And you've probably also noticed the considerable importance of keeping them dry. Not only will a wet battery rust rapidly, the water can create a conductive path around the top of the battery which rapidly discharges it - leading to a nasty surprise if you are counting on your gps or flashlight!
