How to open the battery cabinet

Overview

How do I open the battery compartment?

1) Open the battery compartment by pushing outwards with both thumbs on the compartment cover. 2) If that doesn't work, nudge the battery cover open with a dime at the base of the u-shaped cover as shown below: If these methods do not work, please CONTACT US so we can assist you. This technique works for WonderFlex, NuFlex, and MiniFlex 2 models.

How do you open a AA battery compartment?

If there is not a tab or notch, the battery compartment may be held together with small clips or magnets. In this case, use a small flathead screwdriver to pry the battery compartment open. Assuming you are talking about a AA battery compartment, the lid can usually be pried open with a fingernail or a small flathead screwdriver.

How do you open a car battery?

There is usually a small tab or notch that can be pried open with a fingernail or a small flathead screwdriver. If there is not a tab or notch, the battery compartment may be held together with small clips or magnets. In this case, use a small flathead screwdriver to pry the battery compartment open.

Can you open a battery compartment without a screwdriver?

It is not possible to open a battery compartment without a screwdriver. What can I use if I don't have a tiny screwdriver?

If you're in a pinch and need to cut something, a butter knife or small cheese knife will do the trick. Just take the blade and angle the handle down toward the ground to give yourself some leverage.
